Heart Support Australia
2-10 Oatley Court
Belconnen ACT 2617

Dear Sir/Madam

Heart Support Australia (HSA) does a tremendous amount of work for our local communities. As a voluntary group they have provided support to thousands of local people and their families for many years.

Heart disease affects so many individuals, and for some this often means a "life-changing" event. When people are affected by heart disease they can be quite vulnerable, both physically and emotionally, especially if they are unsupported. HSA provides patients affected by heart disease with a personal encounter offering support, information and encouragement.

The support that members provide to people experiencing heart related illnesses is invaluable. The feedback I have received from patients engaged in HSA services is one of overwhelming gratitude.

HSA does a fantastic job in supporting patients affected by heart disease in our communities. We need to ensure that HSA can continue to provide such valuable support in the future.

Yours sincerely

Dr Chris Alexopoulos
Cardiologist

Dr Kristian Prados
Interventional Cardiologist
